

## Model i612 Twelve-Bay Charger

### Charge Twelve Batteries at One Time

Introducing the iCHARGE 12 -- the newest member of the iCHARGE family. This 12-bay charger is specifically designed to support today's Lilon batteries. As agencies deploy more and more radios, the need to charge large quantities of batteries rapidly becomes critical. Installing dozens of the individual chargers delivered with the radios is just not practical.

The i612 contains 12 complete charging stations that operate independently. All 12 batteries are rapidly charged to full capacity simultaneously, assuring the greatest possible availability.

Comes complete with dual battery adapter shown above, the i612 can be configured to charge from 1 to 12 batteries simultaneously.

#### Benefits:

- **Fastest Most Reliable Charge**
- **Designed for Today's Lilon Batteries**
- **Available in 6 TO 12 Bay Configurations**
- **Prolongs Battery Life**
- **Adapters available for: Motorola and Nokia TETRA, and Nextel radios**
- **User Interchangeable Adapters**
- **No Charging Rules, Batteries can be charged anytime**
- **Precise Termination**
